

# Intellectual Property Rights (IPR) Policy

Open-IX takes no position regarding the validity or scope of any intellectual property rights or other rights that might be claimed to pertain to the implementation or use of the technology or practices described in any Open-IX documents or the extent to which any license under such rights might or might not be available; nor does it represent that it has made any independent effort to identify any such rights. Any material posted as IPR disclosures should be viewed as originating from the source of that information, and any issue or question related to the material should be directed to the source rather than Open-IX. There is no implied endorsement or agreement by Open-IX, the Open-IX Board of Directors or any other Open-IX entities with any of the material.

## 3.1 Open-IX Contribution:

Any submission to Open-IX intended by the Contributor for publication as all or part of an OIX document and any statement made within the context of an Open-IX activity. Such statements include oral statements in Open-IX meetings, as well as written and electronic communications made at any time or place, which are addressed to:

- any Open-IX meeting session,
- any Open-IX committee or portion thereof,
- the Open-IX Board, or any member thereof on behalf of the Board,
- any Open-IX document shepherd or SME in the context of such a document,
- any Open-IX mailing list, any committee or document working group or SME team list, or any other list functioning under Open-IX auspices.

Statements made outside of an Open-IX session, mailing list or other function, that are clearly not intended to be input to an Open-IX activity, group or function, are not Open-IX Contributions in the context of this document. A participant in any Open-IX activity is deemed to accept all Open-IX rules of process. A participant in any Open-IX activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

## 3.2 Required Disclosure and/or Licensing of Standard Essential Patent(s):

A “standard essential patent” is any patent encompassed within a standard, as asserted and/or as determined by a court, which is necessarily infringed by anyone practicing the standard, including the OIX-1 and OIX-1 standards and any other OIX standards.

Consistent with the Essential Requirements of the American National Standards Institute regarding disclosure and licensing of standard essential patents,

[https://share.ansi.org/shared%20documents/Standards%20Activities/American%20National%20Standards/Procedures,%20Guides,%20and%20Forms/2017\\_ANSI\\_Essential\\_Requirements.pdf](https://share.ansi.org/shared%20documents/Standards%20Activities/American%20National%20Standards/Procedures,%20Guides,%20and%20Forms/2017_ANSI_Essential_Requirements.pdf), no person or entity may participate in and contribute to the

development and modification of any OIX standards without first providing to OIX written assurance, in a form provided by OIX, either

1. in the form of a general disclaimer, that such party does not hold and does not currently intend to hold any patent claim essential to such standard, or
2. that such party will offer a license to such essential patent(s) to applicants desiring to utilize the license for the purpose of implementing the standard either
  1. under reasonable terms and conditions that are demonstrably free of any unfair discrimination, or
  2. without compensation and under reasonable terms and conditions that are demonstrably free of any unfair discrimination.

### 3.3 Notice to Standard Implementers:

Further, the attention of any and all users of OIX standards is called to the possibility that compliance with such standards may require use of an invention covered by patent rights. By publication of such standards, OIX takes no position with respect to the validity of any such claim(s) or of any patent rights in connection therewith.

OIX is not responsible for identifying patents for which a license may be required in order to practice one of its standards nor for conducting inquiries into the legal validity or scope of those patents that are brought to its attention pursuant to these requirements.
